

MATERIAL REQUIRED

Here's a basic list of materials and components you might need:

1. **Microcontroller or Microprocessor:** For managing the system, such as an Arduino or Raspberry Pi.

2. **Sensors:**

A. Eye-Tracking Sensor: To monitor eye movement and detect drowsiness.

B. Camera Module: For facial recognition or monitoring

3. **Alert Mechanism:**

Buzzer: To generate an audible alerts.

4. **Power Supply:**

Battery Pack or Power Adapter: To power the system

5. **Software:**

Programming Environment: Such as Arduino IDE or Java for coding the microcontroller.
